

# T-BAR COVER

## BOAT, CAMPER, VAN, RV

A 5 minute build and the structure is up. Light-weight system that also has plastic feet to further protect the roof it is standing on. Suitable for all vehicles and trailers that needs to be protected from the elements.

Light weight and easy to handle.

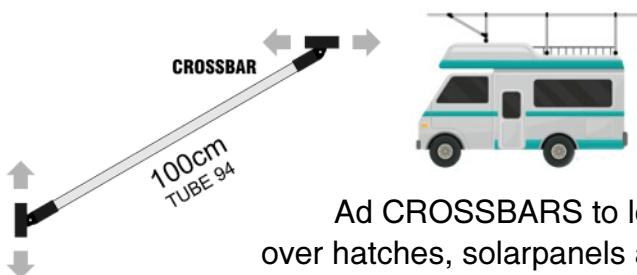

No tools are needed for connecting the parts.

Can easily be mounted alone

Standard model with 3 x T-BARS & Ridge Pipe

Add CROSSBARS to leap over hatches, solarpanels and sloped roofs. This allows for rigid structures in places where a T-BAR foot can not be placed yet support is preferred.
